## Amendments to the Claims

The listing of claims will replace all prior versions, and listings of claims in the application.

## 1-61. (Cancelled)

- 62. (Previously presented) A method for treating Tumor Necrosis Factor-alpha (TNF $\alpha$ ) mediated immune reaction that causes corneal transplant rejection in a patient, comprising topically administering directly to the eye of said patient an effective amount of anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments.
- 63. (Previously presented) The method of claim 62, wherein said anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments are polyclonal.
- 64. (Previously presented) The method of claim 63, wherein said anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments are free of albumin, whole antibodies, pyrogens, and/or viruses.
- 65. (Previously presented) The method of claim 62, wherein said anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments are administered in combination with a dermatologically or opthalmically acceptable carrier.
- 66. (Previously presented) The method of claim 62, wherein said anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments are administered within 24 hours following a corneal transplant in said patient.

- 3 -

- 67. (Previously presented) The method of claim 66, wherein said anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments are administered within 2 hours following a corneal transplant in said patient.
- 68. (Previously presented) The method of claim 67, wherein said anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments are administered within 30 minutes following a corneal transplant in said patient.
- 69. (Previously presented) The method of claim 62, wherein said anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments are administered at least 3 times a day for about 8 weeks.
- 70. (Previously presented) The method of claim 62, wherein said anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments are administered about every 10 to 12 hours for about 8 weeks.
- 71. (Previously presented) The method of claim 62, wherein said anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments are administered in an ophthalmic suspension or ointment.
- 72. (Previously presented) The method of claim 71, wherein said ophthalmic suspension or ointment comprises about 20 mg/ml to about 30 mg/ml of said anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments.

73-75. (Cancelled)

- 4 -
- 76. (Previously presented) The method of claim 62, wherein said anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments are administered in a dermatologically acceptable gel vehicle comprising about 0.01% to about 50% by weight of anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments.
- 77. (Previously presented) The method of claim 62, wherein said anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments are administered in a dermatologically acceptable semi-solid vehicle comprising about 0.01% to about 50% by weight of anti-TNF $\alpha$  F(ab')<sub>2</sub> neutralizing antibody fragments.
